1. INTRODUCTION

Welcome to the Port Community System - PortVerse User Manual, your comprehensive guide to understanding this digital platform. PortVerse is designed to optimize, digitize, and integrate port operations, logistics processes, and regulatory procedures across Pakistan's maritime ports. It aims to enhance inter-agency coordination, streamline cargo management, and replace outdated, paper-based processes with efficient digital workflows. As an integral part of the Pakistan Single Window (PSW) initiative, PortVerse serves as a centralized hub, connecting port authorities, terminal operators, customs, logistics providers, and other stakeholders. This integration facilitates smoother, faster, and more transparent port operations, reducing congestion and aligning with the broader PSW framework. PortVerse is not just a tool for managing daily operations, but a strategic asset aimed at modernizing Pakistan's maritime trade environment, making it more competitive on the global stage. This manual will guide you through PortVerse's features and functionalities, providing the knowledge and tools you need to navigate and leverage the platform for enhanced efficiency and productivity.

2. BACKGROUND

As a signatory to the WTO's Trade Facilitation Agreement (2015), Pakistan committed to establishing a 'National Single Window' (NSW) as a 'Category C' obligation, effective from 22nd February 2017. To fulfill this commitment, the Government of Pakistan enacted the Pakistan Single Window Act, 2021, designating Pakistan Customs as the Lead Agency. In line with this, Pakistan Customs established the Pakistan Single Window Company (PSWC), a not-for-profit organization under the Companies Act, 2017, to implement the PSW program. The PSWC has been designated as the Operating Entity under the PSW Act, responsible for developing and maintaining the PSW portal in collaboration with 77 public sector entities involved in regulating cross-border trade in Pakistan. The PSWC's role includes digitizing the processes of these entities, which will reduce time and costs, increase compliance, and significantly benefit economic operators such as importers, exporters, freight forwarders, clearing agents, shipping companies, and transporters. Additionally, the PSW program's implementation will enhance government controls and transparency.

The Port Community System (PCS), a core component of the PSW system, is designed to optimize, digitize, and integrate port and logistics processes and regulatory procedures. Its objectives include improving cargo management, enhancing inter-agency coordination, creating better B2G and B2B linkages, reducing port congestion, and ultimately saving time and costs for traders.

3. SALIENT FEATURES OF PORTVERSE:

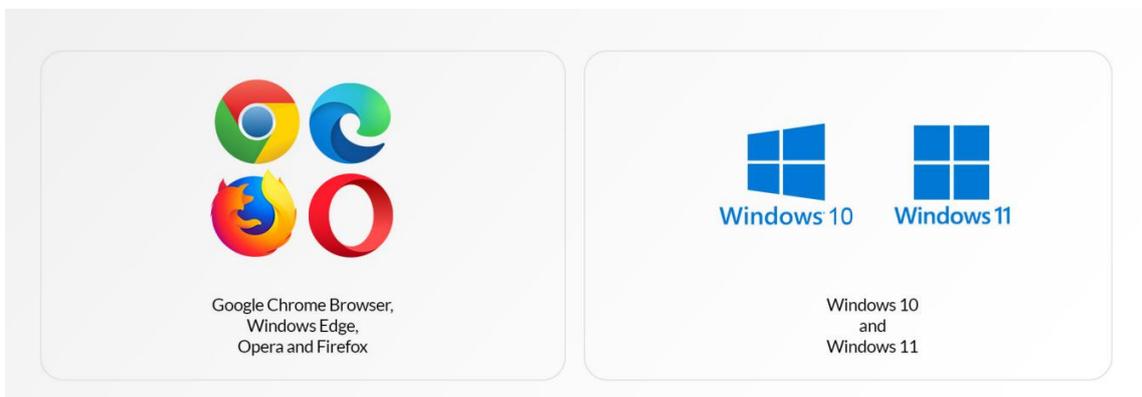

- i. **Centralized Information Hub:** Platform for sharing information among all port stakeholders, including shipping lines, terminal operators, customs, and logistics providers.
- ii. **Real-Time Data Exchange:** Real-time exchange of data between various entities, improving coordination and decision-making.
- iii. **Single Window Access:** Offers a single window for submitting all necessary documentation and information required by various authorities, simplifying administrative processes.
- iv. **Automated Processes:** Streamlines and automates port operations, such as cargo tracking and vessel scheduling, reducing manual errors and processing times.
- v. **Integration with External Systems:** Seamlessly integrates with systems like PSW, WeBOC, and TOs to ensure a smooth flow of information across the port ecosystem.
- vi. **Enhanced Security:** Employs robust security protocols to protect sensitive data and ensure compliance with regulatory requirements.
- vii. **Customizable and Scalable:** Offers customizable modules to meet the specific needs of different ports and scalable to accommodate new functionalities.
- viii. **Analytics and Reporting:** Features powerful analytics and reporting tools to monitor port performance, identify trends, and optimize operations.
- ix. **User-Friendly Interface:** Designed with an intuitive interface that allows users to navigate the system easily, improving user adoption and efficiency.
- x. **Compliance Management:** Ensures that all operations and transactions comply with local and international regulations, minimizing the risk of non-compliance.

4. PRE-REQUISITES FOR CROSS BORDER TRADE AND FINANCIAL TRANSACTIONS

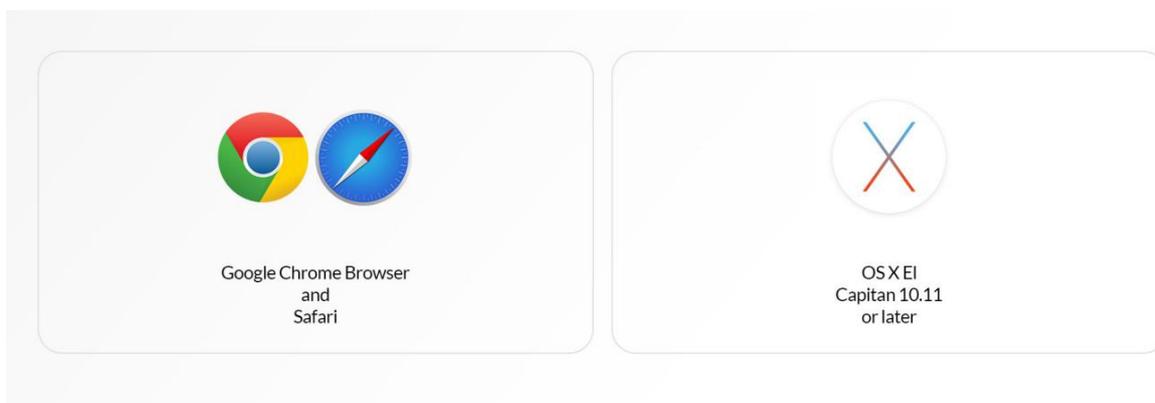

- i. Shipping agents must have an active subscription and registered with Pakistan Single Window (PSW).
- ii. Users must have valid PCS application credentials.
- iii. Shipping agents must be associated with shipping lines to perform the necessary operations through PCS.
- iv. Shipping agents must have a banking profile communicated to PSW by an AD.

5. SYSTEM REQUIREMENTS

To use PSW Portal on Windows®, the subscriber will require

To use PSW Portal on Mac®, the subscriber will need:

6. STEP BY STEP PROCESS

6.1 USER LOGIN – EXTERNAL USER

- i. Please visit “www.pcs.gov.pk” and click on the ‘Member Area’ button.

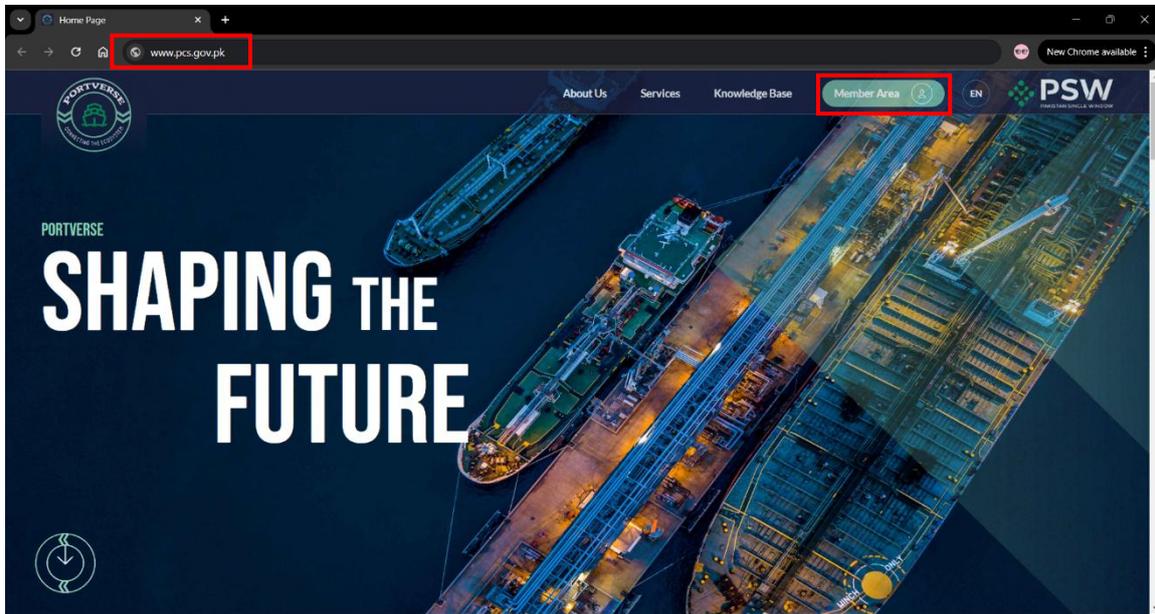

Figure 1 - PCS Website Member Area

- ii. After clicking on the Member Area button, Shipping Agent will be redirected to the login interface of PCS application.
- iii. Enter **User ID** and **Password** and click on the “eye” icon to see the password.
- iv. Click on the **Log in** Button.

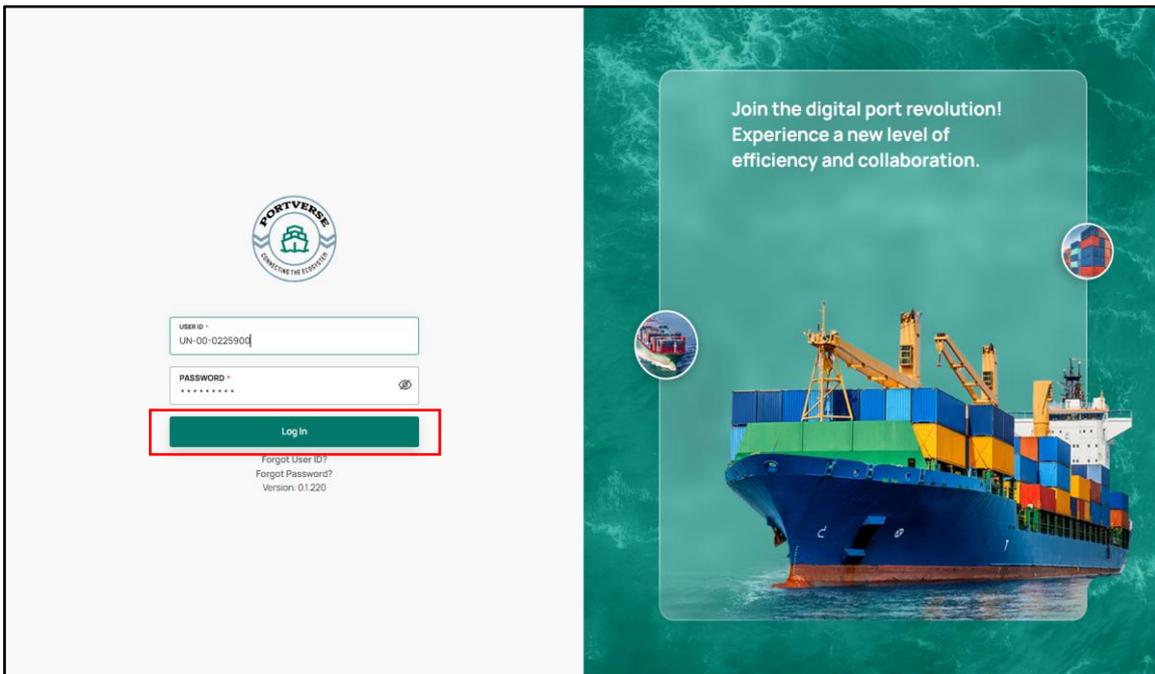

Figure 2 - PCS User Login

- v. A Pop-Up will appear (In case a user has multiple roles).
- vi. Select the required role and click on the **“Continue”** button.

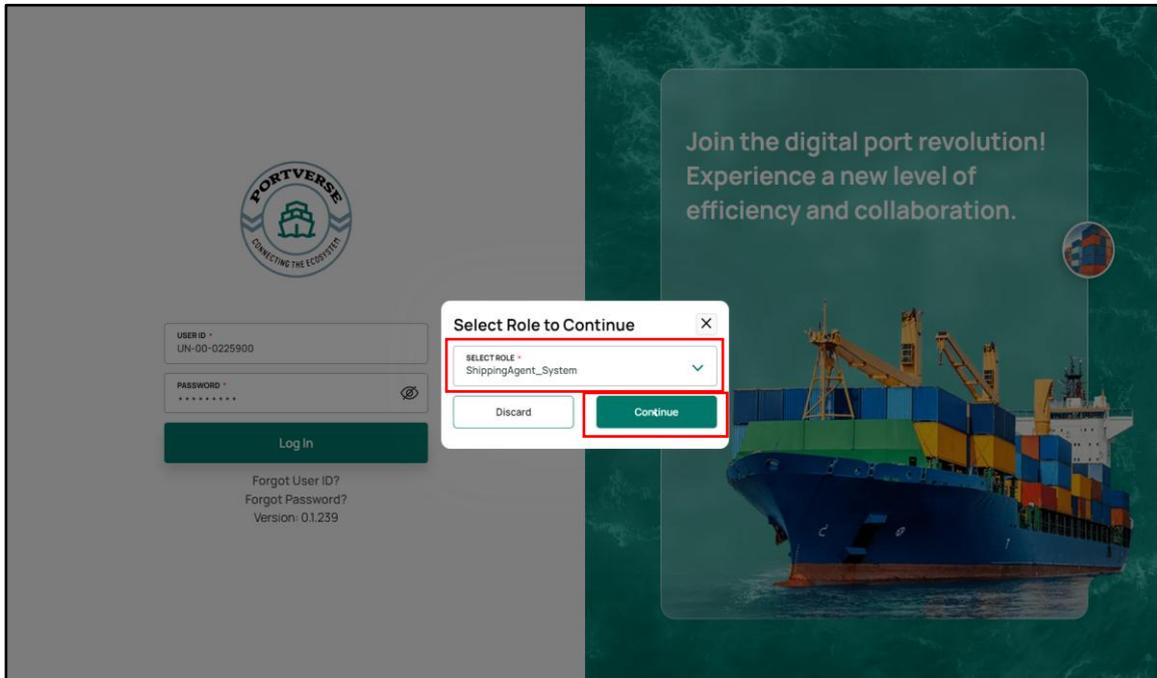

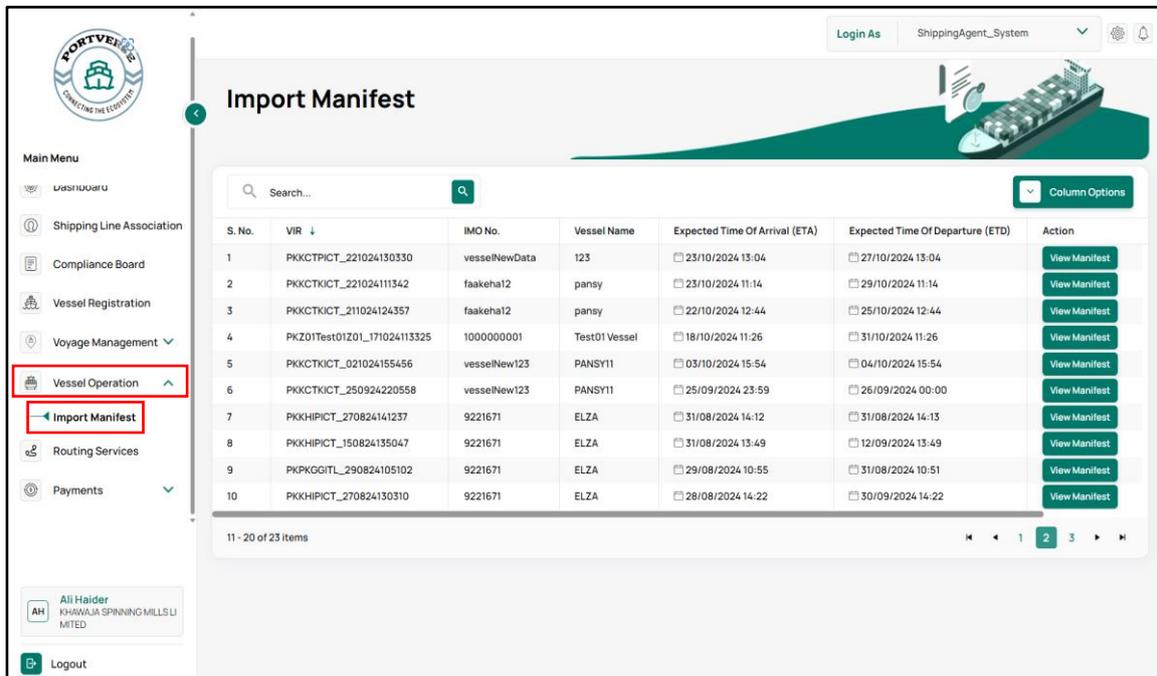

Figure 3 - Select Role

6.2. IMPORT MANIFEST (FAL – 2)

6.2.1. Access to Import Manifest Declaration (FAL – 2)

- i. Click on the “Vessel Operations” menu to access the FAL Forms.
- ii. Click on the “Import Manifest” sub menu option under Vessel Operations.

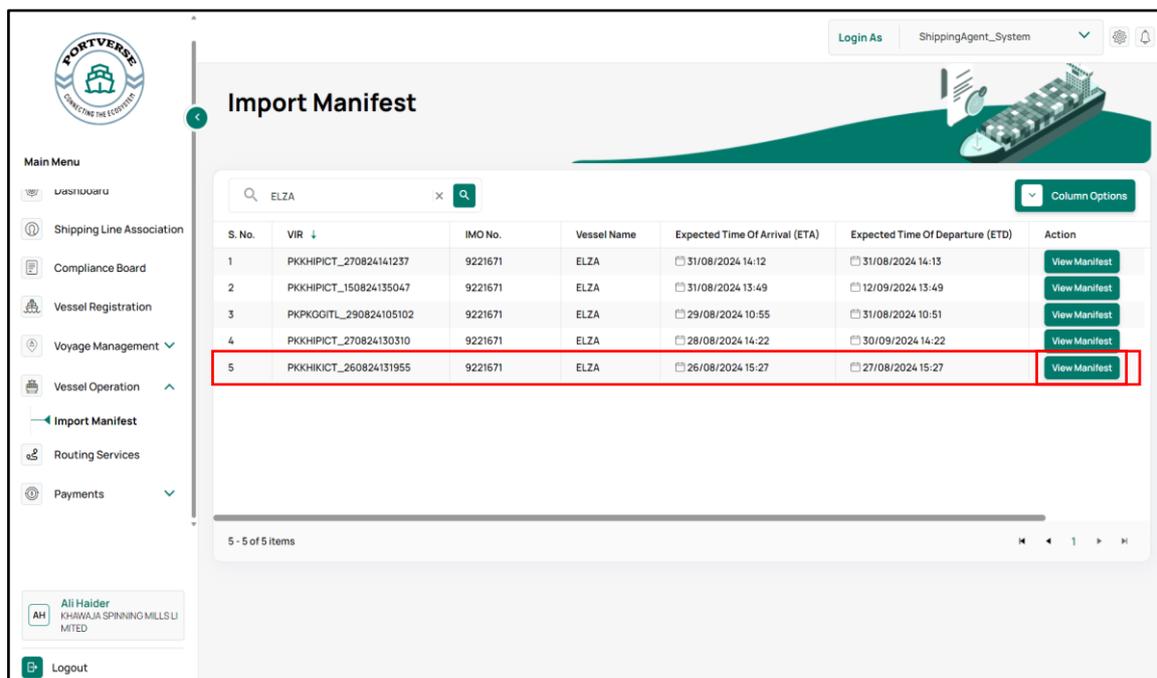

The screenshot shows the 'Import Manifest' screen in a web application. The left sidebar contains a 'Main Menu' with options like 'Shipping Line Association', 'Compliance Board', 'Vessel Registration', 'Voyage Management', 'Vessel Operation', 'Import Manifest', 'Routing Services', and 'Payments'. The 'Vessel Operation' and 'Import Manifest' items are highlighted with red boxes. The main content area displays a table with columns: S.No., VIR, IMO No., Vessel Name, Expected Time Of Arrival (ETA), Expected Time Of Departure (ETD), and Action. The table contains 10 rows of data. The 'Action' column for each row has a 'View Manifest' button. The user is logged in as 'ShippingAgent_System'.

S.No.	VIR	IMO No.	Vessel Name	Expected Time Of Arrival (ETA)	Expected Time Of Departure (ETD)	Action

Figure 19 - BL Info Screen

- xxii. Select the required House BL Number.
- xxiii. Click on the **“Add New Container/Cargo”** button.

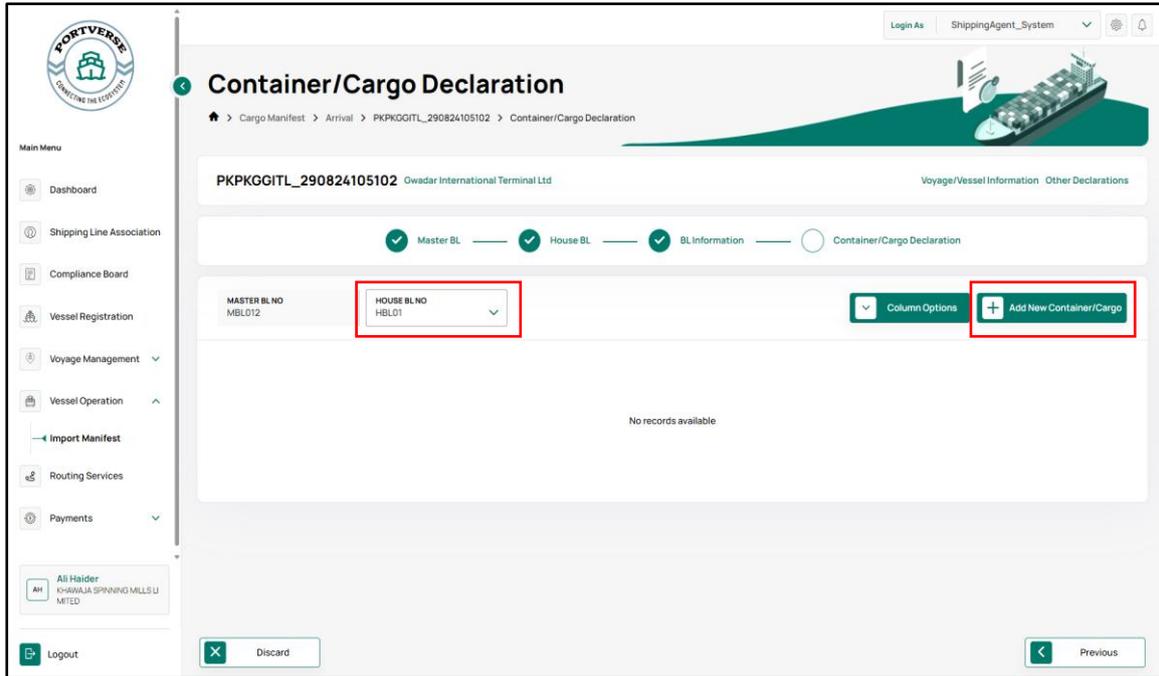

Figure 20 - Container/Cargo Declaration Screen

- xxiv. Enter the Container Information.

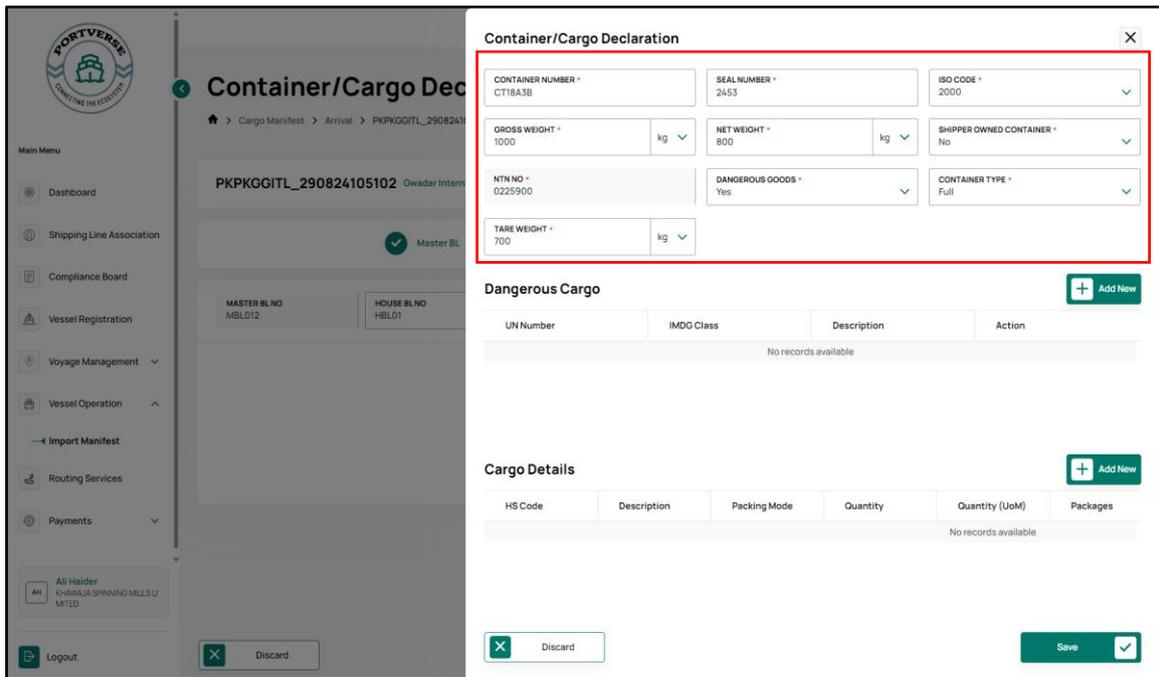

Figure 21 - Container/Cargo Declaration Form

- xxv. Click on the “Add New” button to add the Dangerous Cargo and Cargo details.
- xxvi. Click on the “+” icon to save the information.

The screenshot shows the 'Container/Cargo Declaration' form. The form is divided into several sections: 'Container/Cargo Declaration' (top), 'Dangerous Cargo' (middle), and 'Cargo Details' (bottom). The 'Container/Cargo Declaration' section contains fields for Container Number (CT76AST), Seal Number (1123), ISO Code (2000), Gross Weight (1000 kg), Net Weight (800 kg), Shipper Owned Container (No), NTN No (0225900), Dangerous Goods (Yes), and Container Type (Full). The 'Dangerous Cargo' section has a table with one row: UN Number 0004, IMDG Class 1, Description AMMONIUM PICRATE dry or wette, and Action with a red '+' icon. The 'Cargo Details' section has a table with one row: HS Code 010, Description Pure-bred breeding h, Packing Mode DR, Quantity 100, Quantity (UoM) m, and Packages 100. A red box highlights the '+ Add New' button in the top right corner of the 'Dangerous Cargo' section.

Figure 22 - Container/Cargo Declaration Form

- xxvii. Click on the “Save” button to save the container information.

The screenshot shows the 'Container/Cargo Declaration' form, similar to Figure 22. The 'Dangerous Cargo' table now shows the row with a green checkmark icon in the Action column. The 'Cargo Details' table is the same. A red box highlights the 'Save' button in the bottom right corner of the form.

Figure 23 - Save Container Form

- xxviii. Success Alert will appear.
- xxix. Click **“Ok”** to proceed.

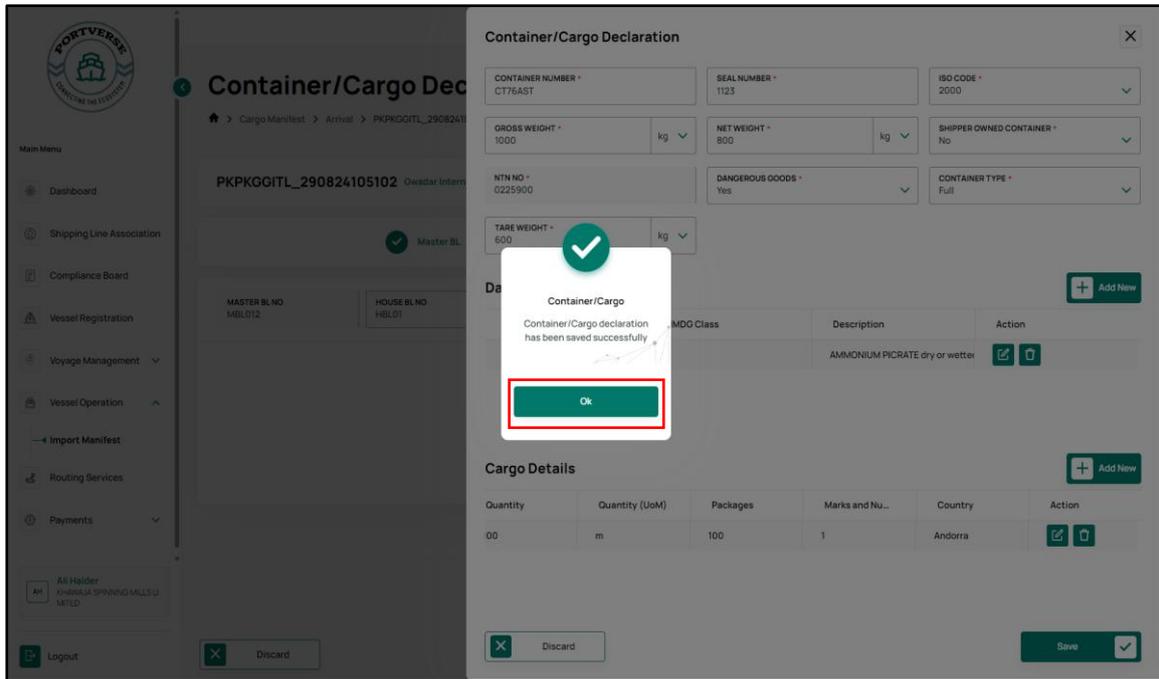

Figure 24 - Success Alert

- xxx. Click on the **“Save”** button to save the Manifest.

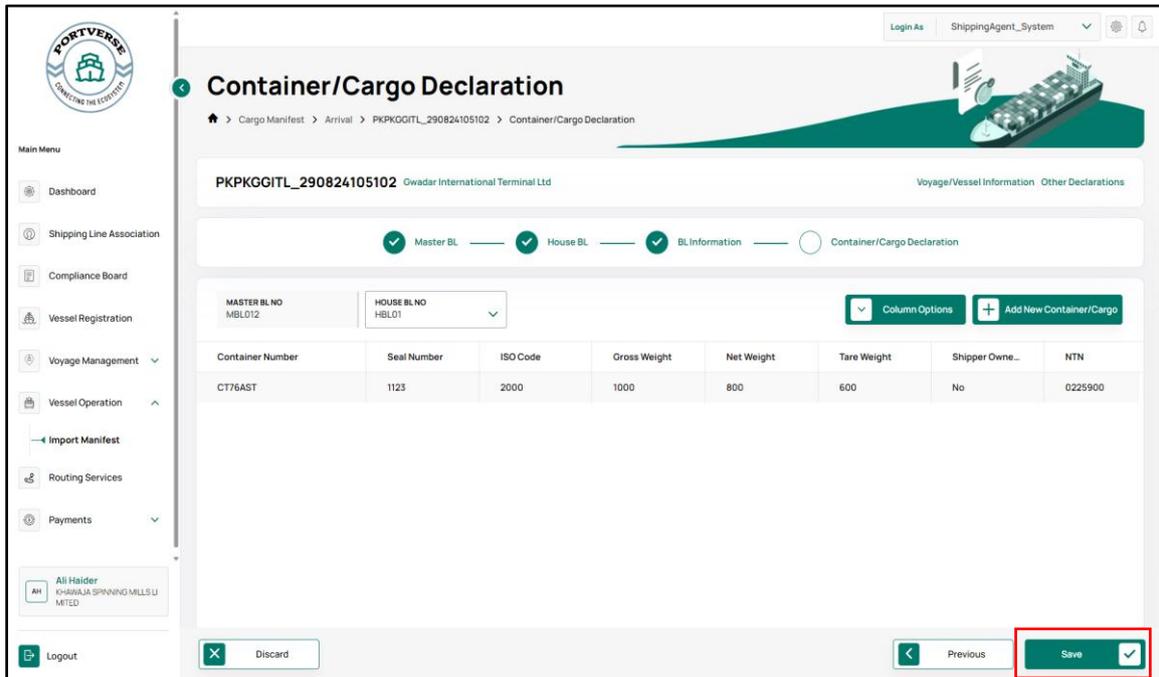

Figure 25 - Save Manifest

- xxxi. Success Alert will appear.
- xxxii. Click on the **Ok** button.

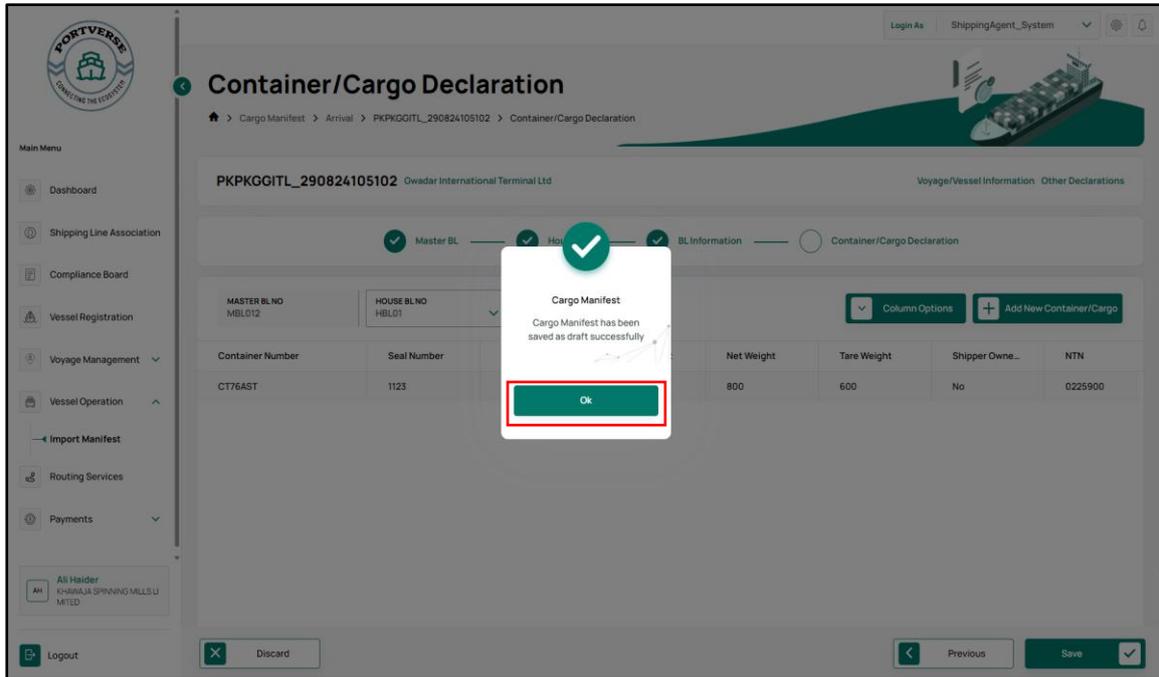

Figure 26 - Success Alert

- xxxiii. Repeat the above step until details pertaining to all the Master BL and it's respective House BL, BL Information and Containers are added in the form.
- xxxiv. Alternatively, data can be added through **Upload CSV** functionality.
- xxxv. To download the Import Manifest template, click on the **"Download template"** button on the Master BL Screen.

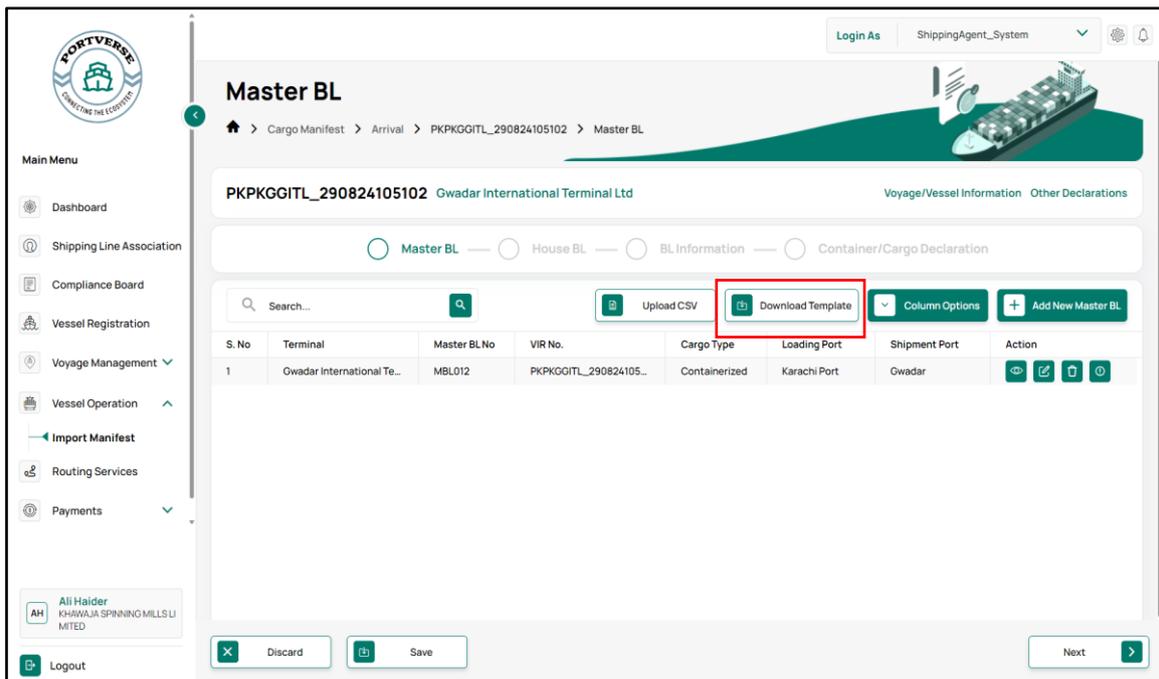

Figure 27 - Download Template

xxxvi. Update the downloaded CSV template as per requirement.

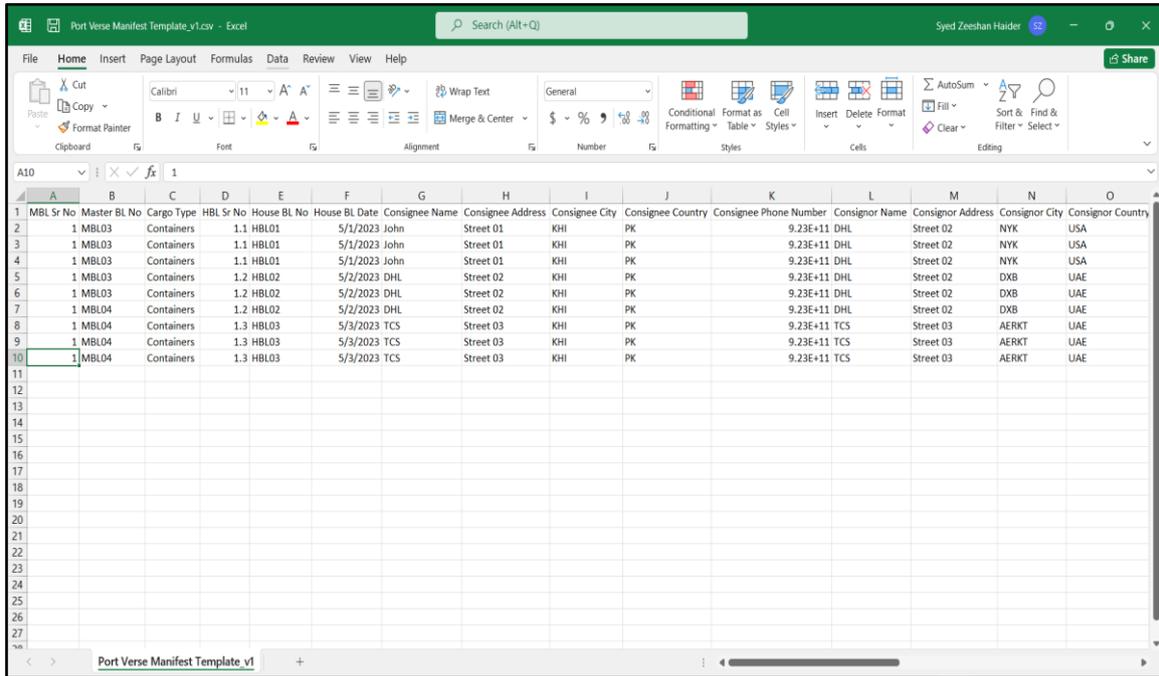

Figure 28 - CSV Template

Note: By default, system will ignore the 1st row of the CSV template (Sample data)

xxxvii. Click on the “Upload CSV” button.

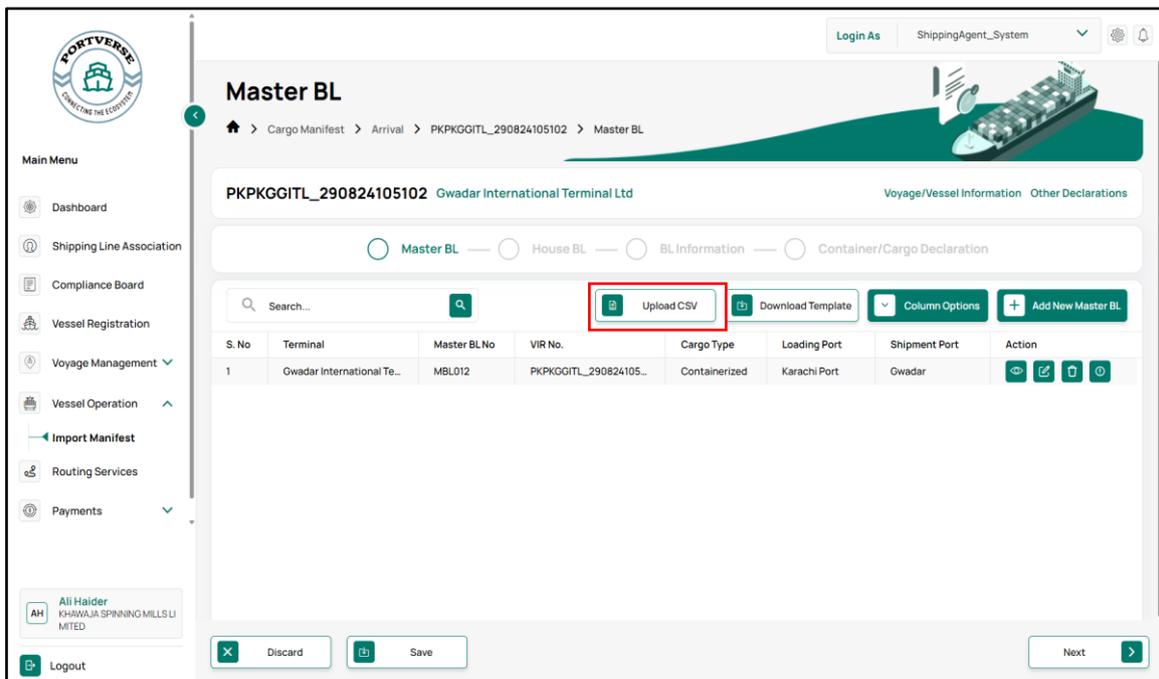

Figure 29 - Upload CSV

- xxxviii. A window will appear for file attachment. Once the relevant file is selected click on the “Upload” Button.

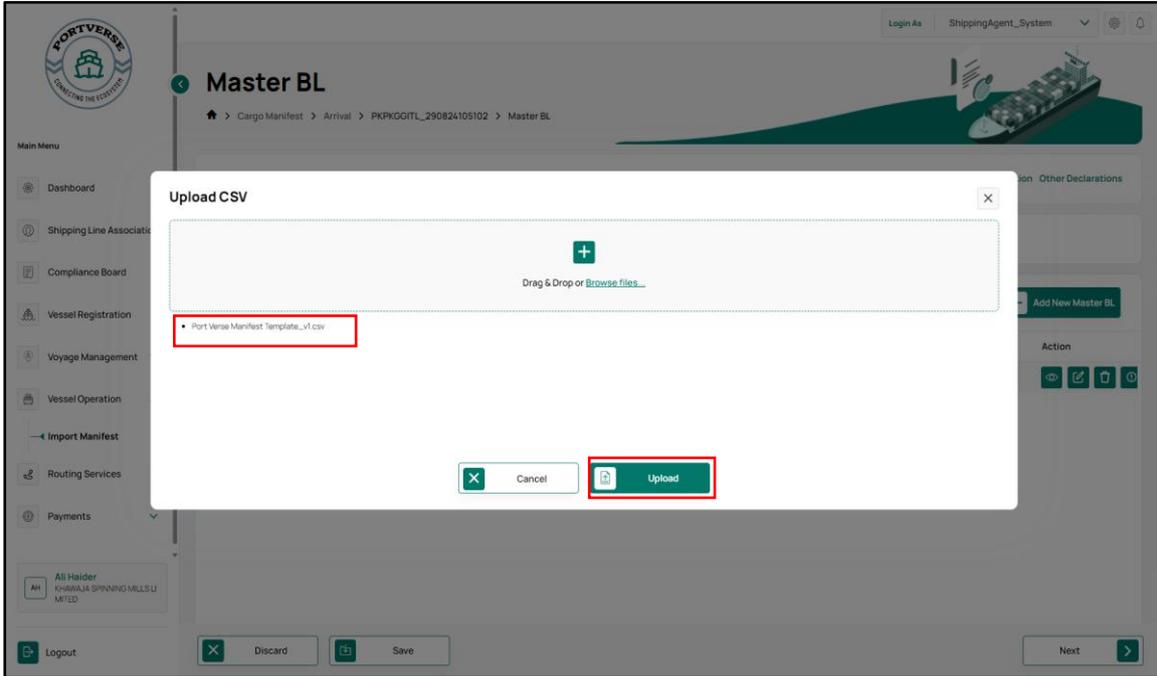

Figure 30 - Upload CSV Window

- xxxix. Records will be displayed on the screen.
- xl. User can **update** and **view** these records (Master BL, House BL, BL Information, Container Info) from their respective screens as explained in the above steps by clicking on action buttons provided at the end of each row (If required).

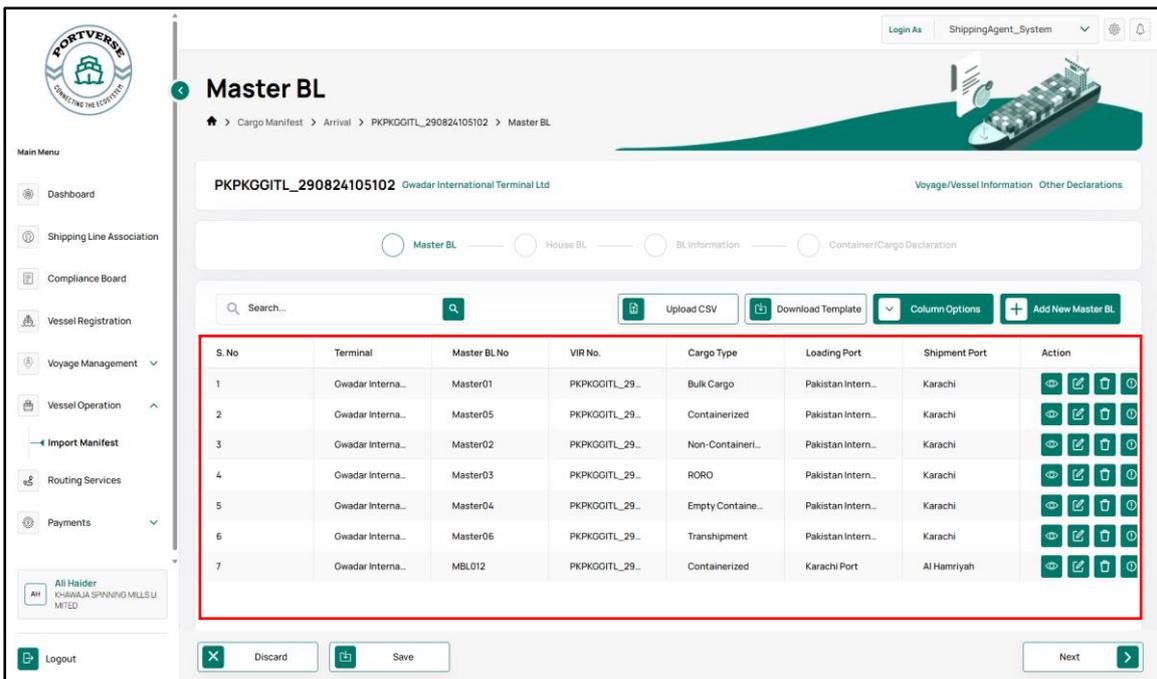

Figure 31 - Master BL Screen

- xli. Click on the **“Submit”** button on the Import Manifest Summary screen to submit the manifest record.

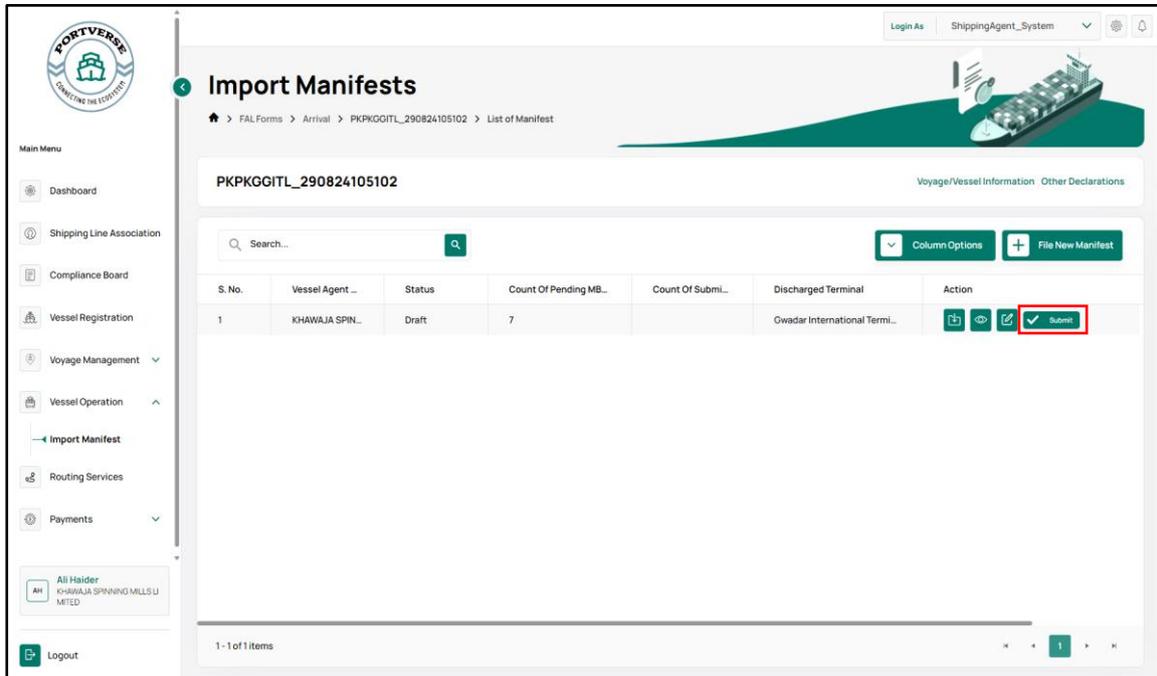

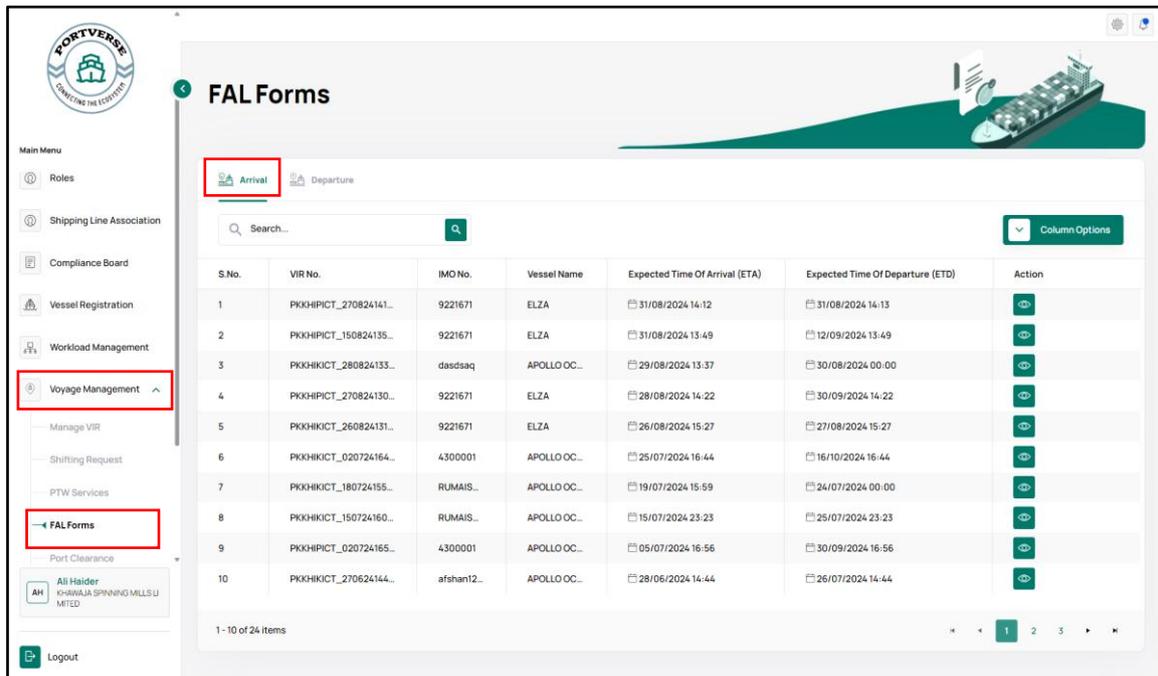

Figure 32 - Import Manifest Summary Screen

6.3. DANGEROUS GOODS DECLARATION (FAL – 7)

6.3.1. Access to Dangerous Goods Declaration (FAL – 7)

- i. Click on the **Voyage management** menu to access the FAL Forms.
- ii. Click the **FAL Forms** sub menu option under the voyage management.
- iii. Click on the "Arrival" tab.

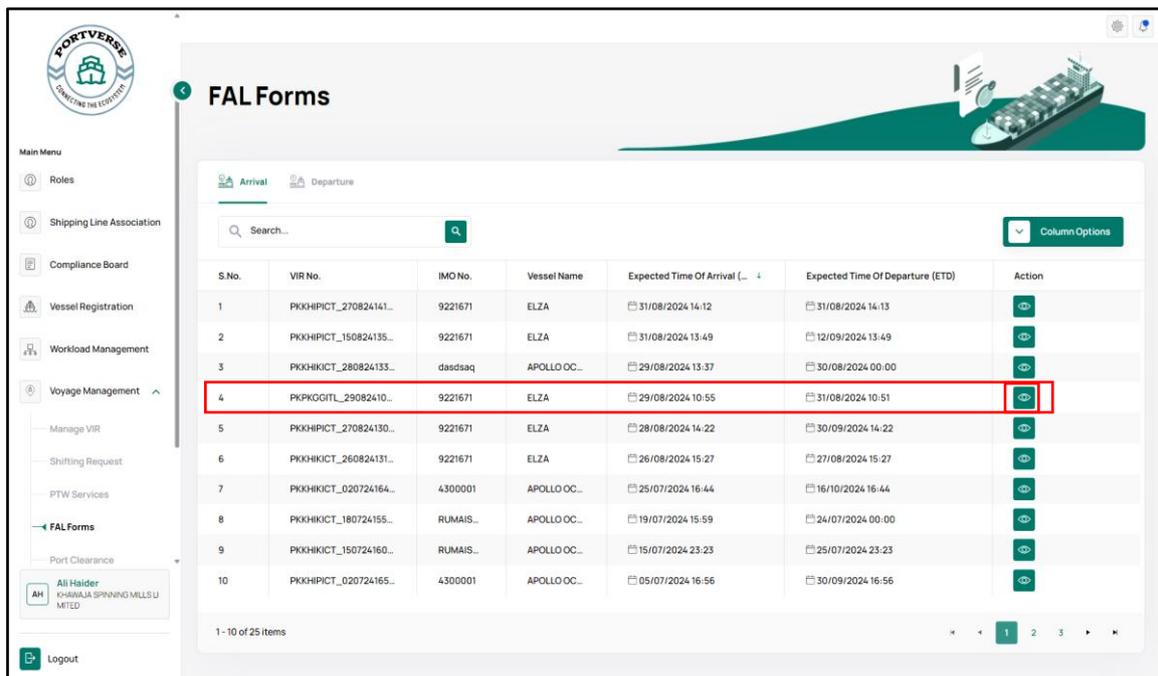

The screenshot shows the 'FAL Forms' interface. On the left is a 'Main Menu' with 'Voyage Management' and 'FAL Forms' highlighted. The main area has tabs for 'Arrival' and 'Departure'. Below is a search bar and a table with columns: S.No., VIR No., IMO No., Vessel Name, Expected Time Of Arrival (ETA), Expected Time Of Departure (ETD), and Action. The table contains 10 rows of data. A red box highlights the 'Arrival' tab and the 'FAL Forms' menu item.
